

Summary

Computer Science undergraduate skilled in Data Structures, Algorithms, and Backend Development. Experience building scalable, low-latency systems using Node.js and Java. Strong focus on clean, modular code and problem-solving.

Education

B.Tech in Computer Science and Engineering — GPA: 9.09

Noida Institute of Engineering and Technology (NIET)

2023–2027

Greater Noida, India

Class XII (CBSE) — 88.33%

K.V. No. 1 A.F.S. Hindan

2022

Ghaziabad, India

Class X (CBSE) — 94.5%

K.V. No. 1 A.F.S. Hindan

2020

Ghaziabad, India

Technical Skills

Languages: Java, Python, C++, JavaScript

Backend: Node.js, Express.js, REST APIs, Microservices Architecture

Frontend: React.js, HTML, CSS

Databases: MySQL, MongoDB, Redis

Tools: Git, Linux

Core Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems, System Design

Practices: Modular Code Design, API Design, Performance Optimization, Caching Strategies

Projects

CollabSphere — Scalable Collaboration Platform | MERN, WebSockets

- Engineered a full-stack collaboration platform supporting real-time task management and communication.
- Designed RESTful APIs with JWT authentication and role-based access control.
- Implemented WebSocket-based real-time updates reducing latency by ~40%.
- Optimized MongoDB queries using indexing improving response time by ~30%.

ChatterLink — Distributed Messaging System | Node.js, Redis

- Built a real-time messaging system supporting concurrent users and multi-room communication.
- Implemented Redis Pub/Sub for asynchronous communication and horizontal scalability.
- Designed event-driven architecture for high-throughput and low-latency messaging.

EduReach — Gamified Learning Platform | Django, PWA, SQLite

- Built a full-stack learning platform with gamification and admin dashboard for user and content management.
- Developed a **PWA with offline-first architecture** and background sync for low-connectivity environments.
- Integrated **Google OAuth** authentication and multilingual support for improved accessibility.
- Optimized backend workflows and database queries to enhance performance and response time.

SnapURL — Scalable URL Shortener | Node.js, MySQL, Redis

- Developed URL shortening service with custom aliases, analytics tracking, and rate limiting.
- Integrated Redis caching to reduce database load and improve performance.
- Designed backend for high availability using efficient indexing and hashing strategies.

Coding Profiles

- Solved 450+ DSA problems on LeetCode with a rating of 1588 (Top 25%).

Achievements

- Participated in SIH 2025, ISRO Bharatiya Antariksh Hackathon 2025, and Code Cubicle 2.0.

Certifications

- Cisco Networking Academy — Introduction to Networks
- Oracle Academy — Database Management Systems
- MongoDB University — CRUD Operations and Data Modeling
